Peer Assistance Services

Peer Assistance Services

A PROBLEM. WITH A SOLUTION.

You've invested so much in your career...
Which makes the thought of losing it all so scary,
and the prospect of hurting a patient even worse.

THE PROBLEM? Substance abuse, psychological or related problems are threatening your practice or that of a colleague.

THE SOLUTION. Safe, caring and confidential, the Pharmacist Peer Health Assistance Program is a proven, peer-assisted approach that has helped hundreds of your colleagues.

ARE YOU ELIGIBLE? Open to Colorado licensed pharmacists and pharmacy interns, the program emphasizes early intervention. When a referral is made—by a friend, family member, peer, supervisor or yourself—an extensive assessment begins. Once it is determined that the public's safety is not endangered, an individualized treatment and rehabilitation program is structured.

The combination of early intervention, stringent monitoring and strong support is powerful. It protects the public. It yields significant cost-savings to employers. And, if you are the pharmacist at risk, it can even save your life.

PHARMACIST PEER HEALTH ASSISTANCE PROGRAM
